SUMMARY

Software Engineer with 2.5+ years of experience building backend APIs, full-stack web applications, and IoT-enabled systems. Strong expertise in Java, Spring Boot, REST APIs, MySQL, and React, with hands-on experience developing production-ready applications and scalable solutions. Proven ability to design real-world systems, integrate hardware with software platforms, and work across the complete software development lifecycle. Seeking backend or full-stack engineering roles.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python, C, C++
- **Backend & Web Technologies:** Spring Boot, REST APIs, Node.js, React, HTML, CSS
- **Databases & Tools:** MySQL, Git
- **Embedded & IoT (Additional):** Arduino, ESP32, Raspberry Pi, Sensor Integration, IoT Protocols

PROFESSIONAL EXPERIENCE

Robotics & IoT Developer

Aug 2023 – Present

Raybot Automation, Nashik

- Developed competition-level control algorithms for robots including **line follower, maze solver, fire-extinguisher, and autonomous boat**, applying sensor fusion and path-planning techniques; **won national and international competitions**
- Developed backend logic for IoT automation systems using **C / C++**
- Built and maintained the company website using **React.js** with component-based architecture
- Integrated **Arduino and ESP32** hardware with web dashboards and live monitoring interfaces
- Designed **database schemas** and implemented **CRUD operations** ensuring data integrity and scalability
- Applied **clean code principles** and **modular architecture** in real-world technical solutions
- Led project development and **mentored teams** to deliver functional prototypes and applications

PROJECTS

[Click to visit My Portfolio](#)

- **ESP32-Based Electronic Voting System** — *ESP32, Embedded C, SD Card*
 - Developed an embedded voting system with push-button vote capture
 - Stored votes on **SD card** and displayed live counts
 - Designed logic to prevent invalid inputs and ensure accuracy
- **Backend-Driven Online Examination System** — *Java, MySQL, REST APIs*
 - Built backend REST APIs for authentication, exams, results, and role-based access
 - Designed normalized **MySQL** schema and implemented secure CRUD operations
 - Scaled system to support **100+ concurrent users**
- **Automated EC2 Deployment Using Terraform** — *AWS, Terraform, SSH*
 - Automated provisioning of AWS EC2 instances using **Terraform**
 - Created reusable infrastructure modules for consistent cloud deployments
- **Corporate Website Development** — *React.js* — [Link](#)
 - Developed a responsive production-grade website using React
 - Optimized code for **50% faster load times**
- **IoT-Based Smart Automation System** — *ESP32, Sensors, REST APIs*
 - Built IoT automation integrating multiple sensors
 - Enabled API-based communication with live dashboards
 - Processed real-time data for automated control

EDUCATION

B.Tech in Computer Engineering

Aug 2019 – June 2023

S.S.V.P.S. College of Engineering, Dhule
